

Materials and PFCs TSG Update

- Responses to comments from last meeting
 - “Need to make much better/complete case for liquids and lithium”, e.g. liquid metal white paper
 - Rewritten introduction along lines of white paper, highlighted NSTX-U position among world machines for PFC/PMI research
- No figures – Now with more figures and tables
- Three thrusts and motivation, convert to “action”
 - Rewritten to contain 3 “topical areas” each with a “notional milestone” to be accomplished
- “Staged implementation of high-Z PFCs” needs more detail
 - Redone “Research Plans” section, but may need to be more explicit
- Need to fix formatting, fix staging section...
