

# ISD Agenda

R. Maingi  
Oak Ridge National Laboratory

## ISD milestones in FY 03

- Startup and Sustainment of 1 sec. long pulses
- Simultaneous achievement of high beta and energy confinement

## Tentative Agenda for ISD discussion

- Gates
  - Continuation of high beta-tau XP220
  - Continuation of rapid current ramp in DND XP228
  - ISOflux development
  - PF-only startup (for Mitarai)
- Leuer - NSTX MIMO shape controller development
- Maingi - LSN termination event + density control
- Menard - LSN long-pulse optimization XP229
- Soukhanovskii- detached divertor with good performance
- Discussion - (density feedback tests...)
