

M&P TSG chapter updates

- Structural changes
 - Removed section V (research plans) and interspersed into “main body” description
 - Included summary paragraph at start of each thrust section
- Mechanical/clarification changes
 - Added “Baseline deliverables for thrust X” to clearly enumerate expected achievements with baseline funding
 - Added “Incremental research and deliverables” to clearly differentiate from baseline plan
 - R. Maingi changes to thrust wording incorporated into document
 - Improved theory section from Stotler incorporated
- **Still on the “to do” list**
 - Incorporate concise description of surface-science studies that will inform in thrust 1 (request to C. Skinner and B. Koel)
 - JEM request to put high-Z staging figures/discussion (and research/qualification plan) into chapter
 - More explicit commentary in thrust description of (de)merits of mixed materials in NSTX-U (thrust 1: important, thrust 2: neutral?, thrust 3: neutral?) and consequences of lack of flowing module (thrust 3: uncertain how long vapor-shielding can be sustained until redeposition rate determined)
 - Formatting...
