

## **Agenda for Transport Breakout Sessions for 5 Year Planning Workshop**

### **4.2 Heating and Power Balance Issues (Mon. PM) – S. Kaye**

- |           |  |
|-----------|--|
| 3:35-3:50 | Overview – S. Kaye   |
| 3:50-4:05 | Stochastic heating of thermal ions by CAEs –D. Gates/N.Gorelenkov                                |
| 4:05-4:20 | Stochastic heating of thermal ions by ETG modes – J. Menard                                      |
| 4:20-4:35 | Steady-state and perturbative measurements of particle and energy transport in NSTX – D. Stutman |
| 4:35-4:45 | Tools for transient tranport experiments – V. Soukhanovski                                       |
| 4:45-5:00 | Fast ion confinement – W. Heidbrink (remote)   |
| 5:00-5:30 | Discussion and plan development  |

### **5.3 Diagnostic Development (Tues AM) – D. Darrow**

- |            |  |
|------------|--|
| 8:30-8:45  | Core turbulence – H. Park (not yet confirmed)    |
| 8:45-9:00  | Core turbulence – T. Munsat                      |
| 9:00-9:15  | Core turbulence – T. Peebles                     |
| 9:15-9:30  | Radial electric field measurements – F. Levinton |
| 9:30-10:15 | Discussion and plan development                  |

### **7.2 Transport/MHD/Boundary combined (Tues PM) – R. Maingi**

- |           |   |
|-----------|---|
| 1:30-1:50 | Pedestal physics – R. Groebner (remote)   |
| 1:50-2:00 | Edge gradient stability – S. Kaye   |
| 2:00-2:10 | SXR Pedestal Diagnostic – V. Soukhnaovski                                       |
| 2:10-2:20 | ELM studies – C. Bush   |
| 2:20-2:35 | ELM stability – P. Snyder (remote)  |
| 2:35-2:45 | High performance benefits and drawbacks of L- and H-mode edge plasmas – M. Bell |
| 2:45-3:15 | Discussion and plan development   |

### **8.2 Transport Theory – Understand the role of electrons vs ions, zonal flows, etc. (Tues PM) – S. Kaye**

- |           |  |
|-----------|--|
| 3:35-3:50 | Gyrokinetic/neoclassical upgrades – W. Lee   |
| 3:50-4:05 | GYRO – R. Waltz (remote)   |
| 4:05-4:20 | GS2 – W. Dorland   |
| 4:20-4:35 | Heat and particle pinches from beam-ion friction – W. Houlberg (not yet confirmed) |
| 4:35-4:50 | Predictive transport capabilities and needs – R. Budny                             |
| 4:50-5:30 | Discussion and plan development  |
