

# NSTX-U / Magnetic Fusion Science Meeting

April 6, 2020

## Agenda

1. CPP report & endorsement, FESAC activities
2. New Insights into the Enhanced Pedestal H-mode Regime on NSTX (*D. Battaglia, PPPL*)

# Be sure to endorse the DPP-CPP community consensus report

- Phase 1 of the community planning process is now complete (<https://sites.google.com/pppl.gov/dpp-cpp/>)
- The final report of the community generated [DPP-CPP Strategic Plan](#) was made available last month
- The CPP co-chairs presented this to FESAC and the newly formed FESAC sub-committee on March 16 ([slides here](#))
- **Please endorse the report [here](#) to indicate to congress and DOE that the community is united and supportive of one another**
  - Remember our definition of consensus is *“I can live with it”*
  - Currently over 400 endorsements (see growing list [here](#))
  - Deadline to endorse is April 30
- Phase 2 of the [FESAC charge](#) has now begun
- FESAC sub-committee actively meeting and is intending to gather additional community input ([see talk at FESAC by Troy Carter](#))
- Expecting to release final report (with budget prioritization) by December 2020
