

Explore the Capabilities™

FBP Broad Spectrum Optical Fiber

- New lower loss broad spectrum fiber, 275nm-2100nm
- Excellent Focal Ratio Degradation characteristics
- Polyimide standard, other coatings available
- Short turn-around on small or large quantities on typical standard fiber sizes
- Typical Core:Clad ratios of 1.1, 1.2, 1.4
- Custom sizes available
- Jacketing available
- Cost effective
- Consistent with Polymicro High Quality, First-Class Material
- Tight tolerances
- Glass/Glass Construction
- Typical NA = 0.22
- Assemblies Available
