MDSplus Event Management System

→ MEMS now talks to EPICS ←

The EPICS display page for three MDSplus events from the Event Summation System.

IOCS1 EVENT: QCS Event Name	QCS Data Value	Wall Time Stamp	Shot TS
Event 100 : TFMON_ACQ_DONE	124288	05/23/07 10:38:16	212
IOCS1 EVENT: QCS Event Name	QCS Data Value	Wall Time Stamp	sec. since last
Event 101 : QCS_TEST	1035	05/23/07 10:35:01	1190
Event 102 : NSTX_EPTST	124288	05/23/07 10:38:16	70

red values indicate an alarm condition.

Web Tool Upgrades

- Different Signals may be plotted on the same frame
- Can plot up to 20 Signals simultaneously
- Conversion to a common timebase is automatic
- Signal names saved in a file may be pasted into Web Tool fields
- “Memory” of previous entries improved

software

NSTX MDSplus Multiple Signal Plotting

Plot different MDSplus Signals on the same plot frame.

When math is performed on signals on different timebases, conversion to the coarser timebase is automatic.

Shot Number(s): ([search for desired shot numbers](#))

For tips on convenient shot entry methods, see [ShotEntryHelp.html](#).

[Help](#)

Enter Signal(s) with tree name, e.g., \wf::ip

Y: (autoscale if blank)

Plot #

\wf:ip	from	<input type="text"/>	to	<input type="text"/>	1
\wf:pnb	from	<input type="text"/>	to	<input type="text"/>	1
\activespec:ts_id	from	<input type="text"/>	to	<input type="text"/>	1
\wf:cii	from	<input type="text"/>	to	<input type="text"/>	2
\efit02::wmhd	from	<input type="text"/>	to	<input type="text"/>	3
\efit02::betan	from	<input type="text"/>	to	<input type="text"/>	3
\PASSIVESPEC:BAYc_dalf_haifa	from	<input type="text"/>	to	<input type="text"/>	4
\operations:mhd_oddn_lowf	from	<input type="text"/>	to	<input type="text"/>	4
\particles::neut_fluct_slw_2fg	from	<input type="text"/>	to	<input type="text"/>	2
