

# PED TSG: Polar region changes impact on Pedestal experiments

A. Diallo & D. Smith

Cinco de Mayo 2017

# PFCR-WG & JEM charges

---

- Get team-wide input on how the polar region changes impact your TSG. Use the 5 year plan goals as a guide, and also the research goals (including draft or approved XPs) from the FY16-17 planned research campaigns.
- Document the plasma shapes (A, R0, kappa, delta, squareness, DRSEP, Rstrike), plasma current ranges, magnetic fields, power/heating levels and/or NB voltages, and min and max pulse or flat-top durations (and anything else I forgot) you require driven by either physics goals and/or diagnostic requirements.
